Wed-5pm   Wed-6pm   Wed-7pm

(1) (10 pts)   Make a diagram of the folks on your team similar to the one on the seating chart, and write down each of their names, and their pronouns.   Also note whether they are present or absent today.

Depending on the orientation of your group, it will look like this:	1 Ishana N. She/Her/Hers Erick R. He/Him/His 4 2 Ethan S. He/Him/His Amanda S. She/Her/Hers 5 3 David F. He/Him/His Leena S. She/Her/Hers 6	or this:	1 Kyle S. He/Him/His 2 Andrew B. He/Him/His 3 Vincent T. He/Him/His 4 Cathy H. She/Her/Hers 5 Javier J. He/Him/His 6 Jessica Z. She/Her/Hers

Now, open your laptop if you have one, or get in a pair or trio with someone on your team that does.

(3) (30 pts) Write down an idea for a new feature: a new kind of search, for example, or a some kind of graph or chart of information that could be provided.   BUT read question (c) below before you make a suggestion.

(4) (30 pts) Explain what the goal of the user would be for the feature you suggested in (b).   A feature should do a job: that is, it should help the user get something done. They have a need, a want, or a desire, and this feature helps them towards their goal.   Who is your user, and what is the need, want or desire that your feature fulfills?
